THE CAPLIN

BY LIVING STONE CONSTRUCTION

The Caplin is a universally designed home that maximizes your mountain views, boasts a real old-world feel, and is incredibly energy efficient. This floor plan works well, on a flat or sloping lot, for families of all sizes and ages. With a large master suite, open entertaining spaces, and optional study all on the main level, it is ideal for the couple that is looking to slow down their professional life and begin enjoying mountain living. Since it can have overflow bedrooms, bathrooms, and recreational space on the lower level, family and friends can stay as (little or) long as you like! This future 4 bedroom can easily be converted into more bedrooms (or bonus spaces) by finishing out the lower level or utilizing some of the oversized attic.
